Explanation of diagram:

Sound data is specified as sound power level LwA in the capacity diagrams. (This is sound to duct.)

These values can be corrected by means of the table for the different octave bands in order to look at Lw (without adaptation to A band).

The correction table for the various octaves is stated in Lw, which means that the Lw values are after conversion of each octave for supply air and extract air.

Radiated sound from the unit must be calculated from the supply air diagram.

Position

Nordic S units can be installed vertically on the floor/wall or suspended from the ceiling and can be in hot and cold zones:

- On a wall
(Mounting supplied with unit.)

- On the floor
Absorption feet must be fitted
(available as an accessory).

- Suspended from the ceiling
A ceiling mounting must be fitted
(available as an accessory).
